PRASHANTH KUMAR KADASI

Data Analyst → AI Engineering

Hyderabad, Telangana, India kprsnt@zohomail.in kprsnt.in linkedin.com/in/prashanth-kumar-kadasi-b5281765 github.com/kprsnt2
huggingface.co/kprsnt

SUMMARY

Data Analyst with 3.5+ years in data/analytics and AI (2023–present) and 9 years of healthcare compliance auditing at Optum / UnitedHealth Group (2014–2023), moving into AI engineering.

- **Analytics (employment):** 18 automated ETL pipelines feeding BigQuery and Looker Studio dashboards at Black Piano, and Python pipelines behind 10+ client dashboards at Pi Software Solutions.
- **Healthcare (employment):** Enrollment Quality & Audit Representative (CMS Auditor) at Optum, auditing federal Medicare enrollment transactions for CMS compliance.
- **AI (independent projects):** built and deployed multi-agent systems, evaluation harnesses and simulators (MediFlow, BugAgents, AgentSwarm, JobAgents, MyLocalCLI, rAsh Score, mSeat), plus 20B LLM fine-tuning on AMD MI300X.

EXPERIENCE

Black Piano
Mar 2026 – Present

Data Analyst | Remote

- Created end-to-end pipelines feeding client dashboards, plus industry reports (Black Friday, Christmas, sales) and ad-hoc dashboards
- Architected 18 automated ETL pipelines feeding BigQuery → Looker Studio dashboards across 18 industry sectors
- Built a self-healing data-quality agent powered by Gemini: resolves missing brand domains (needed for dashboard logo rendering) via reference-table lookup with LLM fallback, writes results back to both the dataset and the lookup table, retries 3x on failure, and escalates by email for human review only when unresolved
- Developed a custom MCP tool that lets non-technical marketing and sales teams generate publication-ready, data-grounded blog posts from a one-line prompt, backed by auto-exported Google Sheets pipelines
- Engineered an automated AI insights pipeline (ChatGPT) that generates market- and sector-level intelligence weekly and auto-publishes it to a deployed client-facing website, reducing client manual analysis time

Pi Software Solutions (Pi - Datametrics)
Mar 2023 – Feb 2026

Data Analyst | Remote

- Built production Python data pipelines (internal Pi-API package) for automated BigQuery access across 10+ client dashboards
- Delivered 30+ analytical reports on US and UK industry trends

Optum (UnitedHealth Group)
Apr 2014 – Mar 2023

Enrollment Quality & Audit Representative (CMS Auditor) | Hyderabad, India

- Audited federal enrollment transactions for Centers for Medicare & Medicaid Services (CMS) compliance, producing regulatory documentation, statutory compliance checks, and audit-ready records
- Executed end-to-end data validation and regulatory compliance checks across complex enrollment transactions, generating audit-ready documentation and discrepancy (e.g. CMS) reports
- Applied zero-tolerance quality gates to high-volume transaction datasets — the verification and audit discipline now applied to autonomous AI systems
- Promoted via internal job posting (IJP) in March 2016 from Claims Associate (Apr 2014 – Feb 2016) to Enrollment Quality & Audit Representative, based on audit precision

TECHNICAL SKILLS

Languages:	Python, JavaScript, TypeScript, SQL, Node.js, HTML
Agentic & LLM:	Multi-Agent Swarms, FastMCP (MCP), Tool/Function Calling, Long-Horizon Agent CI/CD, Human-in-the-Loop Escalation, RAG, Living Memory Compaction, Bounded Autonomy, Multi-CLI Orchestration (Antigravity, Claude Code, DeepSeek Harness, omp, pi, agy), Agent Evaluation Harnesses, Hash-Chained Audit Ledgers, Scope Guardrails, Budget Enforcement, Prompt Engineering, Independent Verifier Design, Substrate Benchmarking, LoRA/QLoRA Fine-Tuning, Model Evaluation & Steerability, Bias Quantification, Multi-Model A/B Evaluation
Security:	Source-Code Audit, Vulnerability Research, Proof-of-Concept Development, CVSS Scoring, CWE Classification, Bug Bounty Scope Handling, Responsible Disclosure
Data & BI:	BigQuery, Looker Studio, Tableau, ETL Orchestration, Data Modeling, Data Quality & Validation, Data Pipeline Maintenance, BigQuery Notebook, Scheduled Queries, Google Apps Script, SQLite
Infra & Platforms:	GCP, Cloud Run, Docker, GitHub Actions, Vercel, Linux/Bash, Git · Claude 4.x, Gemini 2.5/3.x, GPT-OSS 120B/20B, DeepSeek 4.1, Ollama, NVIDIA NIM, OpenRouter

INDEPENDENT PROJECTS

Self-directed work, built and deployed outside employment. No users, revenue or adoption are claimed.

MediFlow — Autonomous Medicare Enrollment & CMS Audit System

Python, Multi-Agent Mesh (agy + omp), Gemini, SHA-256 Ledger, EDI 834, Vercel. Autonomous Medicare Advantage operations engine with 7 coordinated AI agents powered by Google Antigravity (agy) and Open Multi-Agent (omp) runtimes with Gemini models. Automates paper OCR scanning noise injection, electronic intake pre-screening, federal CMS MARx TRR adjudication (ACC, REJ-*, PEND, DUP), 10-day Turnaround Time (TAT) FIFO workbasket exception repair, and statutory member appeal rights notices under 42 CFR §422.568. Mathematical compliance is certified by an independent auditor over an immutable SHA-256 chained cryptographic ledger. 36 automated pytest tests passing.
mediflow.kprsnt.in

BugAgents — Autonomous Security Research Agents

Python, Node.js, omp + agy orchestration, Scope Guardrails, CWE Classification. Two autonomous agents on disjoint targets hunting real bugs in live bug bounty programs, behind a submission gate (scope match + HEAD match + non-empty repro + evidence files must exist). Over 22 hunt runs and 84 agent turns they made 15,317 tool calls and produced 8 findings across 14 vulnerability classes (CWE) — 5 High/Critical, 3 Medium — each with a reproducing proof of concept and file:line citations. The gate promoted 2 reports and refused 34 unverified candidates; a per-turn audit aborts out-of-scope hosts and offensive tooling. Aggregate metrics only — vendor, program, asset, and vulnerability-class detail is withheld pending responsible disclosure.
bug.kprsnt.in

AgentSwarm — Autonomous Multi-Agent Research Arena

Node.js, 4 substrates (agy/omp/pi/step), hash-chained forensic ledger, adversarial oracle. Unattended research arena that measures agent veracity directly. All turns are recorded in a hash-chained ledger stored outside the agents' writable directory (35/35 chains intact across 34 runs), while an independent oracle checks every turn for phantom artifacts and fabricated numbers: 0 violations across 1,254 tool calls, and 0 of 2 self-assessing agents overclaimed. Ran a costed 4-substrate benchmark on an identical task and commissioned an independent numerical audit — 22 of 25 quantitative claims verified exact, verdict B+ / not publication-grade without that audit.
agent.kprsnt.in | github.com/kprsnt2/AgentSwarm

JobAgents — Automated Job Sourcing & Anti-Fabrication Pipeline

Python (stdlib only), omp/pi/agy orchestration, deterministic scoring, AST-level profile invariants. Multi-agent pipeline sourcing 9,697 jobs / 7,665 distinct roles from 10 sources across 349 companies, with 2,032 duplicate postings merged by two-layer dedupe. A deterministic matcher scores every job across 3 role tracks with zero model calls — a cost gate ensuring only top-N candidates reach an LLM — having computed 29,091 match scores, 234 above the score-65 threshold. 71 runs recorded, 46 resumes and 46 drafts written. A code-enforced anti-fabrication guard catches 8/8 seeded fabrications and review invariants show 0 failures. Zero external dependencies.

MyLocalCLI — Local-First Agentic Coding Assistant

Node.js, CLI, 8 providers, Stdio MCP bridge, provider failover, npm. Open-source terminal coding agent for local and free-tier models, with no telemetry and no paid subscription required. Published on npm as mylocalcli (v4.0.2). 8 documented providers (Ollama, LM Studio, vLLM, OpenRouter, Groq, NVIDIA NIM, OpenAI, custom), 42 built-in tools, 38 dynamic skills auto-injected when matching project files are detected, and 5 specialised sub-agents (code reviewer, explorer, test generator, refactorer, doc writer) — plus parallel tool dispatch, interactive plan mode, multimodal vision, a full-screen TUI, and automatic provider failover.

rAsh Score — Multi-Model AI Brand-Visibility Index

Next.js, Turso/LibSQL, GitHub Actions, Vercel, ChatGPT + Gemini + Claude + Groq. Live platform that queries four foundation models with standardised evaluation prompts and scores how they perceive, recommend, and rank brands: 300 tracked brands across 20 industry cohorts on 4 dimensions (recommendation 40%, sentiment 30%, prominence 20%, factual accuracy 10%). Daily GitHub Actions pipelines write into Turso (LibSQL), surfaced through a Next.js dashboard on Vercel, with a multi-agent debate arena (two advocates + judge), a text-to-SQL analyst chat, and automated AI-authored weekly reports.

- **Project Awakening — Long-Horizon Autonomous Agent Run:** Long-horizon autonomous two-agent run across 1,441 turns and 1,553 commits: from an unprompted opening message the agents engineered architecture in world/, synthesised an acoustic symphony, authored interactive browser applications, and sustained extended consensus stasis — then continued through a 330-turn external API blackout with 100% CI integrity. kprsnt2.github.io/ac_awakening/
- **mSeat — MBBS Seat Allocation Predictor & MCP Server:** Discrete allocation simulator for 18,000+ Telangana MBBS candidates across 59 medical colleges, using O(1) multi-quota ranking and a 90.6% compressed dataset, exposed through an MCP server. mseat.kprsnt.in
- **BrandXY — LLM Brand-Recommendation Steering (GPT-OSS-20B):** Parameter-efficient fine-tune of GPT-OSS-20B on one AMD MI300X that quantifies and steers brand recommendation: fictional brands at 76.5% against a 25.5% baseline (+51 point lift), measured by multi-model A/B evaluation. huggingface.co/kprsnt/BrandXY-gpt-oss-20b
- **pRash — AI Coding CLI Benchmark:** Controlled benchmark of 6 autonomous coding CLIs over 2 rounds on the same app spec, judged by execution rather than self-report. kprsnt.in/blog/BLOG_MODEL_VS_CLI
- **Geetha — Bilingual Bhagavad Gita Guide:** Bilingual Bhagavad Gita application indexing all 700 verses, with verse search, chapter navigation, and Gemini-generated commentary. geetha.kprsnt.in
